# REPORTS

### **Metadata Reports**

- Asset History
- Similar Assets
- Data Dictionary
- Relationship Matrix
- Fields Vs Page Layouts
- Record Types Vs Picklists
- Controlling Vs Dependent Picklists

# **Org Cleanup & Optimization**

- Field Usage shows most and least popular data values.
- Picklist Usage shows most and least popular picklist values.
- Last Activity Date find stale reports, dashboards, and email templates.
- Apex Code Coverage view coverage metrics across Apex Classes and Triggers.
- Forgotten Assets identify unused metadata

## **Security Reports**

- Record Level Security see all user access to any set of objects.
- User Activity Timeline see all user activity in account over time.
- Security Health Check monitor org for security and compliance.
- Profiles and Permission Sets view combine profile + permission sets.
- All reports are branded and in CSV, HTML or PDF format and can be automatically saved in content repos or sent to administrators.
